

TESIM

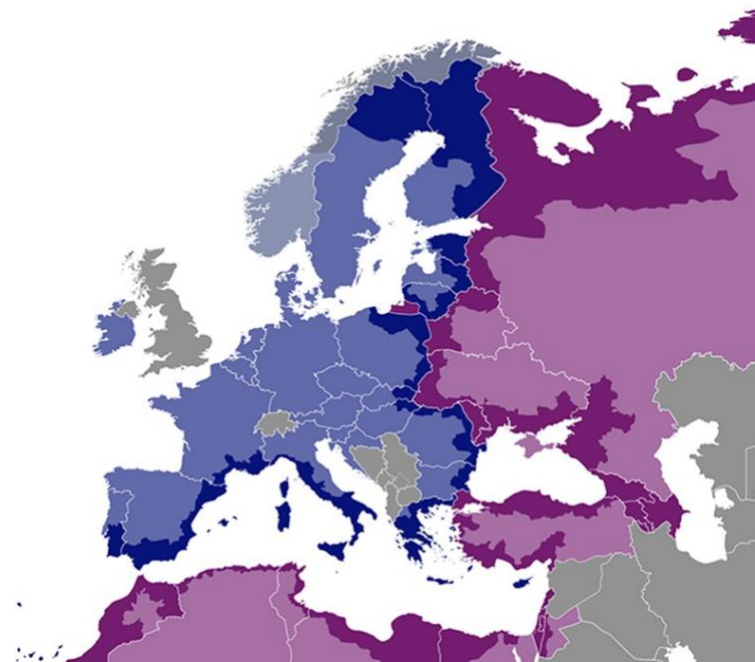

Technical support to the implementation
and management of ENI CBC programmes

Monitoring and evaluation network of ENI CBC programmes

Online event

18 January 2023

AGENDA

Background and general information

The aim of this event is to gather ENI CBC programmes for a joint reflection on matters related to monitoring and evaluation activities, and it will focus on two topics: review of the large infrastructure projects and programme ex-post evaluations.

The recent review of large infrastructure projects carried out by TESIM will serve as a basis for the discussion on the lessons from the implementation of this type of projects and beyond, as many of these reflections and recommendations also apply to the regular projects and will be therefore of interest for all programmes. A short overview of the main outcomes of the review already took place during the CCG meeting at the end of November, but the session dedicated to it in the networking event will go beyond this general introduction.

Also, programmes are already in their final stage of implementation when they consider or even already launch their ex-post evaluations. The exercise launched by the Karelia CBC Programme will be used as a basis of discussion concerning the focus and objectives of the ex-post evaluations in ENI CBC programmes.

Draft agenda of the meeting

Time in CET	
09:00 - 09:10	<i>Welcome and introduction</i>
09:10 – 10:30	<i>Review of the Large infrastructure projects</i>
